Transmission Lubricant Range

ATF / MTF - The complete solution for transmission lubrication.

Rock Oil transmission fluids are engineered to provide exceptional protection and optimal performance under the most demanding conditions. For automatic transmissions, Rock Oil's fluids ensure smooth and precise gear shifts, enhancing driving comfort and vehicle responsiveness by withstanding extreme temperatures, reducing wear and tear, and preventing oxidation to ensure efficient long-term operation.

For manual transmissions, Rock Oil delivers fluids that facilitate seamless gear changes and superior clutch performance, designed to minimize friction and resist thermal breakdown, ensuring quiet and smooth operation even under high-stress driving conditions.
